WORLD CATALOGUE AND BIBLIOGRAPHY OF THE
JEWEL BEETLES (COLEOPTERA: BUPRESTOIDEA)
CHARLES L. BELLAMY VOLUME 3

Spectralia purpurascens (Schaeffer)

Knowltonia calida (Knull)

Ditriaena sexspinosa (Waterhouse)

Sphaerobothris platti (Cazier)

Thomassetia crassa (Waterhouse)

Anadora cupriventris Obenberger

Anthaxia obtectans Kerremans

Lepismadora algodones Velten

Chrysobothris merkelii Horn

Meliboeus punctatus Péringuey

The first complete world catalogue of the jewel beetles, the eighth largest beetle family Buprestidae and its small North American sister-group Schizopodidae, since Jan Obenberger's six fascicle (1926–1937) contribution to the Horn & Schenkling *Coleopterorum Catalogus*. Published in five volumes (more than 3200 pages in total), this catalogue presents a full taxonomic history for all taxa, including fossils, along with distribution and type repository data. The catalogue follows the evolving modern classification which, for Buprestidae, employs 6 subfamilies, 47 tribes, 39 non-nominate subtribes, 516 genera and more than 14,700 valid species. In addition, the first large bibliography on the subject concludes the catalogue with more than 8000 citations.

Volume 3 completes the Buprestinae and includes the large genera *Anthaxia* and *Chrysobothris*, and begins the Agrilinae with the entire large and diverse tribe Coraebini.
