WORLD CATALOGUE AND BIBLIOGRAPHY OF THE
JEWEL BEETLES (COLEOPTERA: BUPRESTOIDEA)
CHARLES L. BELLAMY VOLUME 4

PENSOFT

PENSOFT

The first complete world catalogue of the jewel beetles, the eighth largest beetle family Buprestidae and its small North American sister-group Schizopodidae, since Jan Obenberger's six fascicle (1926–1937) contribution to the Horn & Schenkling *Coleopterorum Catalogus*. Published in five volumes (more than 3200 pages in total), this catalogue presents a full taxonomic history for all taxa, including fossils, along with distribution and type repository data. The catalogue follows the evolving modern classification which, for Buprestidae, employs 6 subfamilies, 47 tribes, 39 non-nominate subtribes, 516 genera and more than 14,700 valid species. In addition, the first large bibliography on the subject concludes the catalogue with more than 8000 citations.

This final volume of taxonomic data includes the enormous genus *Agrilus* and all of the stem and leaf-mining taxa, even though the latter group is very likely to be polyphyletic.
